

TAMPON PRINTING MACHINE SEALED INK CUP 60 E

TAMPON PRINTING MACHINE

High-quality tampon printing machine at a favourable price

Electropneumatic drive

Suitable for automations thanks to PLC

Different sequence cycles adjustable

Ink residue pick up system available

Selection between tabletop and built-in model

Technical Data:

Sealed Ink Cup 60 E		
Art.No.		01 03 62
Ink residue pick-up system left		optional
Single cycle		yes
Double printing		yes
Triple printing		yes
Continuous run		yes
Piece counter		yes
Cycles/h	up to	1.500
Variable speed control		yes
Cliché size	mm	70 x 140
Print image size max.	ø mm	55
Tampon stroke on workpiece	mm	15 - 80
Tampon stroke onto cliché	mm	15 - 50
Tampon installation height max.	mm	60
Force of pressure	N	450
Ink/Doctoring cup	ø mm	60
Drive		electropneum.
Connected load	kW	0,2
Power supply		230 V 1/N/PE
Power frequency	Hz	50-60
Pre-fuse	A	16
Interface		SUB-D 37-poles
Control		PLC
Control voltage	V/DC	24
Pneumatic supply with fine filter 40 µm	bar	6
Air consumption / cycle	NL	2
Width	mm	342
Depth	mm	665
Height	mm	480
Weight	kg	42

Dealer:

Technical Description:

TAMPOPRINT® AG, the market leader in tampon printing is continuously innovative and performing to the highest standards.

With the new "Sealed Ink Cup 60 E" we have succeeded in creating a modern and a technically high-quality electropneumatic tampon printing machine. Based on the previous version "Sealed Ink Cup 60" an electrically driven tampon printing machine with many advantages such as double and triple print or piece counter was developed. Whether as a hand-work place or as a component of an automation, the "Sealed Ink Cup 60 E" can be used almost everywhere.

The optionally available ink residue pick-up system further optimises the range of use of the "Sealed Ink Cup 60 E" and can be retrofitted quickly and at a low price since this new tampon printing machine is already preconfigured for the installation of this ink residue pick-up system. Control is Step 7 compatible, signal exchange takes place via a TAMPOPRINT® automation interface.

The price-performance ratio of this machine series shows that a market leader who has been present on the market for decades can produce on a competitive basis also in Germany.

Highlights:

- Double printing
- Triple printing
- Piece counter
- Suitable for automations thanks to PLC
- Interface SUB-D 37-poles

Options:

- Base frame aluminium profile
- Ink residue pick-up system
- x/y cross table
- Multicolour thrust ring
- Rotary Index Table T2, T4
- Thinner Metering System
