Performance features in brief:

High-performance rotary tampon printing

Automation with 4 rotary printing units:

Output: approx. 15.000 pcs/h

Workpiece:

LongCaps Ø up to 30 mm, height max. 60 mm

Material:

Aluminium

Printing machine:

TOP SPIN LC

Number of colours:

Example: 3 printing inks + lacquer (finish)

Technical description:

The all around printing line with 4 rotary printing units, newly developed by TAMPOPRINT®, produces approx. 15.000 parts/h with a 3-colour print image plus clear lacquer as finish.

The model "Top Spin LC" has been designed for printing on the circumference of aluminium LongCaps.

All screen and line motifs are printed in best image quality. If a particularly good ink adherence or even a glossy feature of the surface is required, there is the possibility to equip the last printing unit with a matt or glossy clear lacquer. This will seal the ink and can be used with all materials and inks.

Your quality standards and the desired production reliability are guaranteed - as it is the case with all TAMPOPRINT® automations thanks to our high "Made in Germany" quality standards for the components and consumables used.

Fig: Feeding

Advantages for the customer:

- The flexibility of the tampon cylinder allows to print even closures with a slightly inclined outer edge.
- Solvent or UV tampon printing inks
- Finish - clear lacquer
